

AVINASH KUMAR

Full Stack Developer

Delhi, India | +91 9354497615 | akak2805034@gmail.com | github.com/Avinash12122002 | linkedin.com/in/avinash-kumar

PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on, production experience building responsive, scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), Next.js with TypeScript, and WordPress. Currently the sole full stack developer for a travel and immigration services company, single-handedly delivering 3 production platforms from initial client requirements through live deployment and ongoing support. Proficient in JavaScript (ES6+), TypeScript, REST API design, and database architecture, with strong Agile debugging and independent project delivery skills.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, C++, C
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, WordPress
- **Backend:** Node.js, Express.js, REST API Design & Integration
- **Databases:** MongoDB, MySQL
- **Tools & Concepts:** Git, GitHub, Postman, VS Code, SDLC, Agile Development, Code Reviews, CRM Systems, Deployment

EXPERIENCE

Full Stack Developer — Groworld Vijatour Pvt. Ltd. | Delhi, India

May 2026 – Present

- Serve as the sole developer for the company's digital platforms, personally handling requirement gathering, UI/UX design, coding, QA testing, deployment, and long-term maintenance across 3 production systems.
- Build and maintain tmsvisa.com, the company's primary visa services website, on the MERN stack integrated with WordPress, helping generate 50+ visa inquiry leads per month through optimized contact forms and landing pages.
- Run triloknathimmigration.in, an immigration consultancy website built on the MERN stack with a WordPress content layer, supporting 30+ monthly client inquiries through a mobile-responsive, SEO-friendly design.
- Architect and maintain crm.tmsvisa.com, a full stack CRM built with Next.js and TypeScript, featuring 20+ capabilities including lead pipelines, client records, and case tracking, now managing data for 100+ active clients.
- Engineer the REST APIs and MongoDB schemas powering real-time data sync across all 3 platforms, without a dedicated backend team.
- Reduce manual client-tracking effort for the sales team by keeping lead and case management in the CRM instead of spreadsheets.

Frontend Development Intern — IBM | Remote

Jul 2025 – Aug 2025

- Collaborated in a 5-member team to design and develop responsive frontend components using React.js, HTML, CSS, and JavaScript within an Agile SDLC environment.
- Supported testing and debugging across 2+ browsers to ensure cross-browser compatibility and performance optimization.

Full Stack Intern — UpToSkills | Remote

Mar 2025 – Jun 2025

- Led an 8-person core team (coordinating across 30 developers) to develop an AI-driven assessment platform using React, Node.js, Flask, and MongoDB.
- Delivered 10+ key modules including quiz generation, HR & candidate dashboards, analytics, and proctoring systems within a 3-month sprint.
- Reduced quiz setup time by 80% through automated workflows integrated with the Gemini AI API.

PROJECTS

tmsvisa.com — MERN Stack, WordPress

- Company's primary visa services website; combined a React/Node.js frontend with a WordPress-managed content layer so non-technical staff can update service pages independently.
- Optimized for mobile responsiveness and fast page loads, contributing to a 50+ monthly lead volume through the site's inquiry forms.

triloknathimmigration.in — MERN Stack, WordPress

- Immigration consultancy site covering 10+ service categories, built on the MERN stack with WordPress content management for easy updates.
- Structured with SEO-friendly pages and clear calls-to-action, supporting 30+ client inquiries per month.

crm.tmsvisa.com — Next.js, TypeScript, MongoDB

- Internal CRM with 20+ features spanning lead pipeline management, client record-keeping, case status tracking, and role-based dashboards, built with Next.js and TypeScript.
- Now used daily by the sales and operations teams to manage 100+ active client records in one place, replacing manual spreadsheet tracking.

Online Assessment Test — React, Tailwind CSS, Node.js, Flask, Gemini API

- Built a role-based login system supporting 2 distinct user types (HR & Candidate) with secure authentication and database management.
- Integrated Gemini API to auto-generate 100+ quiz questions in under 20 seconds.
- Developed real-time proctoring across 3 monitoring modules (webcam monitoring, tab detection, eye-tracking) to maintain test integrity.

Additional Projects — Node.js, MongoDB, JavaScript, Three.js

- **Airbnb Clone** (Node.js, Express.js, MongoDB, EJS, Tailwind CSS) — Implemented full CRUD operations across property listings with secure login/signup flows for hosts and guests.
- **Solar System Simulation** — Modeled all 8 planets in an interactive 3D visualization using JavaScript (Canvas API/Three.js), with real-time orbit animations.
